SIGNALS INTELLIGENCE COMMITTEE

Office of the Vice Chairman

10 June 1988

NOTE TO:

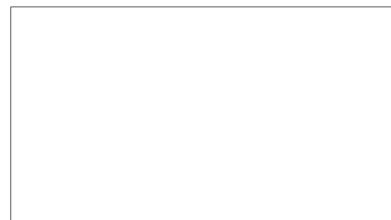

25X1

While we have had numerous discussions on this subject, I remain concerned that the current organization of your study on Future Signals may lead to undesirably wide exposure of specially compartmented information.

To remedy this, I request that you publish what is now Volume I: Summary as the entire report. It should be purged of all references to the other sensitive backup material. That is, it should be a stand-alone final report. As such, it will need the addition of a short Executive Summary. The remaining material in Volume II should be released as separate, limited distribution, technical documents from relevant sponsors.

Thank you for your assistance in this matter.

25X1
